A 4 Leaf Photography Photo Montage

We are dedicated to preserving your old memories and making new ones to last a lifetime. Our staff is professionally trained to provide you with the highest quality, friendly service at great value. Our customers come first. We treat each project as if it were our own and work closely with you to ensure that your video meets and exceeds your expectations.

What we do for you:

We specialize in transforming your cherished photos into a memorable video that will be treasured by the generations to come. Our photo montages are available on DVD and as a digital file and come complete with pans, zooms, titles, and captions, set to the music of your choice. Before creating your slide show, we bring each photo back to life by adjusting the colors, light intensity, contrast, etc. Whether you want to display a special moment in your life, like the birth of a child or a wedding, or you want to memorialize a loved one who has passed on, 4 Leaf Photography's Photo Montages can help you to keep those memories alive forever.

What is Photo Retouch?

Photo Retouch is an added bonus to hiring 4 Leaf Photography to produce your Photo Montage video. We will not only digitally scan your images for your slideshow but we will go one step forward and digitally retouch your images. Before creating your slide show, we bring each photo back to life by adjusting the colors, light intensity, contrast, etc. Please read below "*We provide your digitally scanned images on disc.*"

What sets our montages apart from the rest?

Step-by-Step Assistance

We understand how overwhelming planning a project like this can be, so our goal is to make it as simple as possible. Within 24 hours of filling out an order form, we will contact you to discuss each detail of your order. We will walk with you through the entire process making suggestions and answering questions to ensure that your photo montage meets and exceeds your expectations.

No Hidden Costs

Many other companies who produce photo montage movies have hidden costs. We are very upfront with you during the ordering process. Our package price includes everything we say it does. Our packages include the complete production; scanning (if needed), retouching, color correction, photo animation on our NLE (Non-Linear Editing) Computer System, authoring and burning to DVD, packaging and even SHIPPING. We even go one-step further and provide viewing of your photo montage on your very own personalized web page for one month. This will allow your friends and family to view your photo montage from any where in the world. Don't be fooled by the price. We truly love what we do and we get much gratitude out of knowing we are making a lasting memory for you and your loved ones forever. We pride ourselves in our upfront honest approach with every project we take on.

Personalized Services

DVD and Internet viewing: You will have the ability to not only view your montage on DVD, but you, your friends and family will also get to again watch the beautiful montage on the internet with your personalized web page.

Order your photo montage prints: After watching the montage there will be many family members who will say they wished they had prints of some of the photos in the montage, again we help you do that as well. After digitally scanning and retouching your images we upload every image to the internet for password protected viewing and ordering.

Event Montage Cards: If you plan to present your photo montage at a party or group gathering your "event montage cards" will be the hit of the party. The small 4x3 cards will have information pertaining to your event, how to view the photo montage over the internet and order or view images from the montage. Additionally, if you give us 5 referrals you will get \$100 OFF your next video montage or one FREE 30 minute studio portrait session.

Our Photo Montages are moving pictures

In more ways than one our Photo Montage Movies are moving pictures. 1) With music and images we are able to evoke emotion from the viewer watching our productions. You will feel joy, excitement and may even shed a tear or two while watching one of our productions. 2) Your photos in your movie presentation pan and scan across the screen. Unlike the idea that the words "slide show" connotes, our productions include complete scaling and motion of every photo. You will never see a static photo on the screen. Your images will creatively zoom in the frame, creating a truly documentary feel that you are only accustomed to seeing in a documentary T.V. production. Don't be fooled by the competition, insist on viewing an example photo montage and see for yourself if they are all the same.

We provide your digitally scanned images on disc

After we have scanned your treasured, priceless photos we then save them to our database. We will archive your images on disc and safe keep them in our studio for a lifetime. You are also able to take home a copy of your digital photos. You can purchase a CD of all your images for only \$35. Your image disc will contain every color-corrected and retouched photo that was part of your Photo Montage Movie.

You can take your disc to any photo lab and have reprints of your scanned photos made very inexpensively or even do so on your home computer and printer. Since the files that we have provided for you are color-corrected and retouched you will find that your photo reproductions will look much better than the originals.

Your images that are on your disc can also serve as a backup to your original printed images. You never want to think horrible thoughts, such as fire, flood or theft. With your images on disc you can safely preserve your treasured memories by keeping your disc in a safe location (fire and water proof box or your bank's safety deposit box). For more reassurance and peace of mind we will keep a copy of your Photo Montage Movie and photo images on DVD. Therefore if you for whatever reason loose your disc we will have a backup for you. Therefore, having your photos presented as a Photo Montage Movie is only one of the many reasons to have us produce a presentation for you. You are also preserving your images forever with the peace of mind that they will always be safe and preserved so your memories will last a lifetime!

We Give You Choices

No two 4 Leaf Photography Photo Montages are the same.
When ordering, you'll be able to choose:

- * Background Flat Color or Video moving background
- * Slide Show Style (classic or fun)
- * Personalized Title Slides & Captions
- * Video Format (DVD or digital file at no additional cost)
- * Music (see our [song ideas](#) or choose your own)

This allows YOU to have control over the finished project. The final result can be anything from a classic picture slideshow with smooth fades and floating photos to a fun-filled trip down memory lane with explosive animations and spinning pictures!

Add onto any package

Additional DVD copy <i>(includes cover art)</i>	\$25
Additional Title Slides or Text on Photos	\$1
Additional Photos added <i>(includes scanning if needed)</i>	\$2
All scanned images saved to an image CD	\$35
Additional Montage Cards	2 for \$1

Better Effects & Equipment

To ensure your video will withstand the effects of time, we use the finest media available. Each photo is carefully animated by Kris, a trained and degree holding professional designer; we do not produce "cookie cutter" presentations. Your slide show will come complete with pans, zooms, tilts, and captions. We utilize the "Ken Burns" effect, commonly known as the "pan and scan" effect. This method brings each photo to life by slowly zooming in on focal points, panning across a photo with several people, or zooming out from the key person(s) in the picture.

For help selecting the music for your personalized photo montage go to the following web page:

<http://www.4leafphoto.net/music>

Thank you for entrusting us with preserving your memories forever. We hope to serve you soon!
